Executive summary

This batch yields zero priority accounts and three monitor-tier accounts requiring validation before outreach, with Natural Grocers standing out as the highest-scoring account at 7.5/10 (WARM) and the clearest starting point in the set. The strongest confirmed signal pattern is physical store expansion into new geographic markets - Natural Grocers has announced openings in Lake Geneva, Wisconsin (its first-ever Wisconsin location, February 2026) and Rock Springs, Wyoming (January 2026), both of which are confirmed signals, not inferences, and indicate active investment in new retail footprint. Natural grocery retail is the strongest segment in this batch by average score, while wellness retail scores the lowest and should be deprioritized until stronger buying signals emerge - no wellness account in this batch demonstrated the kind of confirmed activity that warrants near-term pursuit. This week, contact Natural Grocers using the new-store-opening angle specifically tied to the Lake Geneva launch, framing your offer around what their first Wisconsin location will need at opening to serve a new regional customer base.
